

Studio 7.5 visits Australia

THE DESIGN TEAM BEHIND 'SETU' MEETS WITH LEADING AUSTRALIAN DESIGN FIRMS

Burkhard Schmitz & Carola Zwick from Studio 7.5 were in town recently to promote their latest multipurpose seat: Setu. Meeting with a number of leading design firms the team from Studio 7.5 talked about their design process and the benefits of this unique product.

Designed for how we live now, Setu is a breakthrough in seating technology. Its single kinematic support spine cradles you and mimics your every move without the need for adjustment. Designed by the team that designed the award-winning and innovative Mirra chair, Setu is a chair designed to fit all shapes and sizes in virtually all spaces and places. Adaptable like

no other chair in its category, Setu appeals to your functional needs as well as your design aesthetic. It can be the feature of any room or simply be noticeably unnoticeable. Introduced in 2009, Setu's unique design has already received recognition, awarded Best of NeoCon Gold in Conference Seating category and Best of NeoCon Silver in Sofas & Lounge Seating category and named one of Interior Design magazine's Best of Year products for 2009.

For more details on Setu or to test one for yourself visit www.hermanmiller.com.au and click on Where to Buy.
